I think this can be done.

Идеята е много проста:

**нужно е само да имаш сметка за търговия + акаунт
в социална мрежа за трейдъри**

Its the grid strategy. Even not a strategy, the way of trading. I analyse D1 and H4 periods to know where up or down the prise is going to move.
 I do the analisis with support/resistance levels, trend lines, prise action patterns, some indicators.
its high risky but high profitable strategy!
Dont invest money that you cant afford to lose! Everything can happen.
 Then i go to M15, M5, M1 period. There i try to catch the extremum points with the help of divergence, some of the figures and some indicators.
Minimum recomended deposit - a half of my own!
 Broker site: <http://alpari-forex.com/en/>
 Account type: Alpari-ECN-New (ecn-new.mt4)
 Leverage 1:500! Minimal lot 0,01!!!
 Its strongly recommended to open account from this broker because of slippages!!!

Hi Silent, No matter what happened with your recent trades.

I like your trading and made a lot with your signals. Keep on the trade with extra care what you have learned from the mistakes.

Very improper Risk to Reward, you add to losing positions and hope for retracements , which is insane and akin to gambling. When the signals were free, you were going good and when you started charging, in other words, showed greed, you shot our asses.
